

The background of the slide is a collage of four images, all in a dark blue, monochromatic style. The top image shows a large steel truss bridge spanning a river, with a city skyline of illuminated buildings in the background. The middle-left image shows a modern, multi-story residential or institutional building with a curved driveway. The middle-right image shows a large, modern building with a prominent arched roof structure. The bottom image shows a large, modern building with a prominent arched roof structure, similar to the one in the middle-right image.

Draft Control Measures

**OKI Board of Trustees and Executive
Committee Meeting**

4/14/05

Draft Recommendations

1. Cleaner burning gasoline during summer months
 - Continued use of reformulated gasoline (RFG) in Kentucky
 - Low Reid vapor pressure gasoline (RVP) in Ohio: 7.0 or 7.8

Draft Recommendations

2. Electric Generating Units (EGU)

- Receive full credit for \$330 million spent on control equipment
- Receive full credit for additional \$1.8 billion to be spent
- Full implementation of Clean Air Interstate Rule (CAIR) – acceleration if possible

Draft Recommendations

3. Strategic area source controls

- Vapor pressure limit for cold cleaning degreasing operations
- Automotive refinishing emission reductions
- Controls on commercial spray products

Draft Recommendations

4. Voluntary measures

- Biodiesel availability
- Installation of diesel oxidation catalysts and particulate filters on trucks, buses
- Continuation of RideShare and Smog Alert programs
- Incentives for idling reduction programs: trucks and locomotives
- Increased use of ethanol
- Use of gas cans that reduce emissions
